### About

I designed this super chunky keyhole scarf for my mother in law. She's constantly on the go so I wanted to give her a scarf that was functional yet stylish to help keep her cozy and looking good when running from errand to errand. The keyhole serves as the function and helps keep the scarf securely in place but, it's also easy to take on and off when running in and out. The detail of the wide ribbed pattern adds the style to this otherwise simple scarf.
